

Report
of the WG 1 meeting on
Use of Molecular Markers for Diversity Studies
in the frame of COST Action FA1104 on
Sustainable production of high-quality cherries for the European market
03 – 05 Marc 2014. Budapest

The program was carried out in two places:

1. Danubius Hotel Flamenco, 1113. Budapest, Tas vezér u. 3-7. (3-4th of March)
2. Corvinus University of Budapest, Faculty of Horticulture, Department of Applied

Chemistry

H-1118 Budapest, Villányi út 29-43. (5th of March)

There were 27 - 27 participants in the meeting at 3rd and 4th as 24 participants in the University at 5th.

17 oral presentation and 2 posters were delivered following with active discussions.

Daniela Giovannini presented the state of art of the common collection of the most promising genetic resources.

The signed lists of participants were given to the chair, to Jose Garcia after the final presentation.

The list of the presentations together with the abstracts and the pdf of the presentations find please enclosed.

Beside the scientific presentations there were discussions on the possibilities of the HORIZON 2020 call at 3rd, 4th and even 5th. Jose Garcia presented the idea about the common proposal.

From Hungarian side Attila Hegedűs presented results about the common sour cherry research going on at the Fruitculture Research Institute and in the different departments of the University, which could be a base for a proposal for the Hungarian participation.

I ask you to accept my report together with the booklet and presentations.

In case of any question let me know please.

Sincerely yours

Ildikó Balla
local organizer, MC of Hungary

Budapest, 2014. March 11.
